Summary

Senior Civil Engineer. Well-versed in numerous projects including pre-engineered steel design and construction, high rise buildings, reinforced concrete design, and finishing works as well. Looking for another great opportunity in my career growth.

Experience

Senior Project Coordinator - 04/2013 to present

Roots Group Arabia, Jeddah

King Abdul-Aziz International Airport Jeddah (KAIA)

- Coordinating with all engineers and subcontractors.
- Reviewing work progress on daily basis.
- Preparing material submittals (MTS), material inspection requests (MIR) for the delivered material, and requests for work inspection at site (RIW)
- Closing out NCRs, SI, and PLF
- Maintains receiving, warehousing, and distribution operations.
- Controls inventory levels by conducting physical counts; reconciling with data storage system.
- Monitoring local warehousing, material handling, and shipping requirements; advising management on needed actions.
- Processing orders.

Construction Manager - 08/2009 to 02/2013

RAMCO Trading and Contracting, Beirut

Raouche 1090

A 22-floor luxury apartments building with five basements, ground floor and a service floor with breathtaking landscape and water mirrors.

- Responsible of all concrete and excavation works, waterproofing activities, shop drawings, and as-built drawings.

Project Engineer - 04/2008 to 07/2009

Al Habtoor Leighton Engineering, Dubai

The Emerald Palace Hotel & Apart., Kempenski, the Palm Island

- Execution of different reinforced concrete works, mainly columns, beams and flat slabs.
- Completing all types of finishing works including facing, plastering, flooring, cladding, painting, wallpapering, suspended ceiling, and glazing.

Date of Birth

January 01, 1981

- Married

Experience

Structural Engineer - 06/2007 to 03/2008

Khatib & Alami (K&A), Beirut

Kiwan Project located in Syria

The project consists of a luxurious international hotel complex on a total area of 60,000 m²

- Overall design of two sections out of total number of sections of the project. Design included beams, slabs, columns; shear walls, etc. using ACI code.

Structural Engineer - 02/2004 to 01/2007

BUTLER Co. for Pre-Engineered Steel Buildings, Jeddah

- Studying & screening the data set with the attached architectural and structural drawings received from clients/builders, as per ISO requirements.
- Analyze and design of miscellaneous projects, mainly low rise buildings (LRF, MRF, and wide span buildings) in addition to roof.
- Following up both, approval and erection drawings, to be sent to the customers and to the plant for construction.

Education

Bachelor degree of Civil Engineering (1998-2003).

Beirut Arab University, Lebanon.
